Talking about professions in everyday situations

A piece of cake for parents

How to support my child

I talk about professions in everyday situations:

- Who repairs broken appliances or vehicles?
- Who advises me at the pharmacy or in the supermarket?
- What jobs are there in the hospital?

At my child's school,
the Career Orientation Coordinators,
known as "StuBos", assist me.

- Talking about your own job
- Talking about general work life in everyday situations
- Encouraging my child to explore different careers and discover their strengths

Picking a career

I'll help them discover their innate talents and skills – and the jobs that go with these.
